Dear Tina

Key developments

Marking a historic date on the chemicals calendar, today's third and final REACH Registration deadline ushers in the beginning of one uniform regulatory system for all chemicals on the EU/EEA market, says Echa's head, Bjorn Hansen. This, he says, forms the basis to protect our environment and citizens from the risks of chemicals, marks the start of a transparent and fair internal market, and gives a predictable frame for innovation in the future. However, SME trade body Ueapme has raised concerns with the "thousands" of substance registrations that have not yet materialised.

In the US meanwhile, three Senate Democrats have sent a letter to EPA Administrator Scott Pruitt questioning whether industry interests have slowed the release of the agency's revised formaldehyde assessment under the IRIS programme.

And in Asia, a Taiwanese parliamentary committee has added the creation of a "national chemical substance control board" to draft changes to the

Toxic Chemical Substance Control Act (TCSCA). The changes are currently passing through the national legislature.

REACH deadline days gone by ...

... [Midnight, 30 November 2010](#)  ... in what was described as a "momentous day", Echa was able to record nearly 3,400 phase-in substances registered in 24,675 dossiers, and no major technical hitches. Geert Dancet congratulated companies for rising to the challenge of the first REACH deadline and for not pushing for an extension, especially against the backdrop of a difficult economic situation ...

... [31 May 2013](#) ... Echa received 9,084 registration dossiers for 2,923 chemicals manufactured or imported in quantities from 100 to 1,000 tonnes/year in time for the second REACH deadline.

"It is great to observe that this deadline went by with no big problems, showing that registration is becoming routine and the solutions we found with industry in 2010 to a number of practical problems were comprehensive," said Bjorn Hansen, head of the chemicals unit in the European Commission's environment directorate. "Now the focus will be on the next and last deadline of 2018."
